

Introduction

The Environment and Climate Change Department of the Brihanmumbai Municipal Corporation has the key responsibility of tackling climate challenges and enhancing environmental protection in Mumbai. The department has evolved from the Environment Department, reflecting an expanded commitment to these critical issues. The department is dedicated to strategic and holistic action against climate change.

The Environment and Climate Change Department is the nodal department for key initiatives like the [Mumbai Climate Action Plan](#), [Majhi Vasundhara Abhiyan](#), the [National Clean Air Programme](#), and sustainable development projects under the [15th Finance Commission](#), and is at the forefront of creating a sustainable and resilient Mumbai. With a focus on three core areas—Environment Protection, Knowledge and Information, and Environment and Climate Change—the department is committed to driving on-ground actions to meet the city's environmental and climate goals.
