4	<b>Blood Transfusion Sets sterile non-toxic</b> PVC with soft transpaent kink resistant tube. Latex tube for convenient extra medication Plastic soft transparent Murphy chamber with filter smooth plastic spike, sharp enough for easy piercing easily controllable roller clamp Needle - 20/21G. Leak proof double polythelene packing. Batch number Mfg & expiry date, sterility date & method must be mentioned.	No.	972197 Nos	5 Nos.	Drug Mfg. Lic.& ISO-9001:2000 Cft.
7	<b>Infusion Sets-sterile Non-toxic P. V.C.</b> with soft transparent kink resistant tube. Latex tube for convenient extra medication. Plastic soft transparent Murphy chamber. Smooth plastic spike, sharp enough for easy piercing. Easily controllable roller clamp Needle - 20/21G. Leak proof double polythelene packing. Batch number, Mfg. & expiry date, sterility date & method must be mentioned.	No	4738180 Nos	5 Nos.	Drug Mfg. Lic.& ISO-9001:2000 Cft.
8	<b>sterile Infusion set of non-toxic PVC with</b> soft transparent kink resistant tube, Latex tube for convenient extra medication plastic soft transparent Murphy chamber with <b>built in air vent</b> . Filter at the infusion end of tubing. Smooth plastic spike. sharp enough for easy piercing. Easily controllable roller clamp Needle - 20/21G. Leakproof Double Polythelene packing Batch number, Mfg. & method must be mentioned.	No	859230 Nos	5 Nos.	Drug Mfg. Lic. & ISO-9001:2000 Cft.

	<p>cords &amp; external nerves to assist in correct placement.</p> <p>A black intubation depth marker Located 3cm proximal to the cuffe. This assist in accurate placement of the tracheal tube within the trachea 1cm graduation on side of the tube to identify the distance from the bevel. Cuffe should be profile &amp; made from soft PVC material, minimising the risk of trauma, cuffe should be high volume, low pressure type to minimise lateral pressure on tracheal wall. The resting diameter of the cuffe should be large ensuring effective seal in trachea, even when small tracheal cuffes are used. There should be radio- opaque line on the tube to confirm position of the tube. The preformed bend should have markings for cutting tube shorter postoperatively for easier suctioning Should have an inflatable pilot balloon to help indicate cuff pressure, having clear markings such as Cuff Resting Diameter, with a spring-loaded one-way valve, and a blue inflation line. The tube confirm to the international standards &amp; safety features</p> <p>Size - Tubes 9.0</p>				
120	<p>Uncuffed South polar preform tubes :</p> <p>soft atraumatic tip uniform internal diameter, south limb covered so as to avoid any pressure on a chin &amp; lower tip. The design should ensure free access to maxilla, upper lip, pallet &amp; nose while maintaining symmetry should be made up of clear, thermo - sensitive, PVC material to allow observation of the condensed exhold moisture 1cm graduation on the side of the tube to identify the distance from the tip. A black intubation depth marker located at the level of the vocal cort assist in accurate placement of the tracheal tube within the trachea. Inflation line take off point should lie outside the mouth bevel of the tube should face laterally. Murphy eye should be smooth &amp; should be on the side opposite to the bevel. There should be Radio- opaque line on the tube to confirm position of the tube &amp; should confirm to the international standards &amp; safety features.</p> <p>Size - Tubes 8.0</p>	<b>Tube</b>	<b>2984 Tubes</b>	2 Tubes	- Drug Mfg. Lic. & CE Cft.
124	<p>cuffed South polar preform tubes :</p> <p>soft atraumatic tip uniform internal diameter, south limb covered so as to avoid any pressure on a chin &amp; lower tip. The design should ensure free access to maxilla, upper lip, pallet &amp; nose while maintaining symmetry should be made up of clear, thermo - sensitive, PVC material to allow observation of the condensed exhald moisture 1cm graduation on the side of the tube to identify the distance from the tip a black intubation depth marker located at the level of the vocal cords assist in accurate placement of the tracheal tube within the trachea. The cuff should be profile &amp; made form Soft PVC material, mnimising the risk of trauma.
