**1. PREAMBLE:-**

Pise- Panjrapur installations are important installations & almost 50 % (2020 MLD) of the total water supply to the city of Mumbai is supplied through these installations. Various plants have been established at these installations to deliver potable water to Mumbai, including pumping stations, sub-stations, settling plants, filter plants, and chlorination plants. which were developed in three stages in 1979, 1986, 1997 and 2002 under the Mumbai Stage I, II, and III Water Supply Projects and Yewai chlorination Plant.

During its commissioning, various equipment such as pressure vessels, E.O.T. Cranes & Carbon Steel Chlorine gas Battery Pipeline were installed in accordance with The Factories Act, 1948 to ensure the safety and maintenance of the plant infrastructure. These installations are located at key facilities including the chlorine plants, filter plant, and settling plant.

The pressure vessels, E.O.T. crane and carbon steel chlorine gas battery pipelines installed at the Chlorine Plant (Yewai), Chlorine Plant (Panjrapur), Filter Plant, and Settling Plant (Panjrapur) are required to be inspected and tested periodically, as per the provisions of The Factories Act, 1948.
